Political Science (POSCI)

Politics rules over everything you do as a human being and gives you an understanding that enables you to have more control over your own life.

John Adams argued that the reason to study politics is so our children may have the liberty to engage in commerce in order to give their children a right to pursue painting, poetry, and music.

Political Science inquiry is the study of how power in its myriad forms is used in human affairs and interrelationships and the structures operating in human societies; and the consequences of these for people as individuals, in groups, and in society. We study the unfolding human story on Planet Earth and just who it is we humans are going to become. This discipline of inquiry is an integrated field of study drawing upon all the social & behavioral sciences perspectives including most notably: sociology, anthropology, geography, philosophy, psychology, economics, urban & organizational studies, and futures studies. At College of Alameda we seek to prepare students to be effective global citizens in a 21st century knowledge economy guided by the democratic ideal, an ethic of service & the principles of sustainable life, and these framed within the context of futures consciousness. We offer support in pathways to career success through our partnerships with local nonprofit organizations and relationships with Bay Area universities.

In addition to the Political Science degrees and certificates explained in this section, POSCI courses are core components of several Pathways. See the Specialized Learning Opportunities section in this Catalog for more information on:
